• Dum Dum, Kolkata

Summary

I am an enthusiastic Frontend Developer with a strong passion for building responsive and user-centric web applications. Proficient in HTML, CSS, JavaScript, and ReactJS, with a solid foundation in C, Java, and C++. Currently pursuing a B.Tech in Information Technology to deepen my development skills, I am actively enhancing my projects and expanding their functionality. I am eager to contribute to innovative projects that align with organizational goals and values. As a self-driven individual with a keen interest in website cloning and Full Stack Development, I am committed to delivering high-quality solutions.

Projects

Music Website

- I developed my first responsive web project using HTML, CSS, JavaScript, and MySQL. The project functions similarly to Spotify but without the use of APIs, as I have not yet learned them. I plan to add more features in the future.
- Check out the demo of my website: Music Player Website

Random Number Guessing Game

- Created a simple number game using only Java programming.

Skills

HTML · CSS · JavaScript · ReactJs · C   · Java · C++ · Shell Scripting
